医疗科普范文一 2011 PASSAGE 2

37. What can we learn from the first two paragraphs?

38. As is suggested in Paragraph 2, the two factors relevant to women's longer lifespan are _____ .

39. According to Paragraph 3, which of the following statements is true?

40. Which of the following phenomena makes researchers puzzled?

41. The word "edge" in Paragraph 6 means " _____ ".

42. What is the main idea of the passage?

原文

①People are living longer than ever, but for some reason, women are living longer than men. A baby boy born in the United States in 2003 can expect to live to be about 73, a baby girl, about 79. This is indeed a wide gap, and no one really knows why it exists. The greater longevity (长寿) of women, however, has been known for centuries. It was, for example, described in the seventeenth century. However, the difference was smaller then—the gap is growing.

新东方在线 www.koolearn.com 网络课堂电子教材系列

扫码获取云盘

②A number of reasons have been proposed to account for the differences. The gap is greatest in industrialized societies, so it has been suggested that women are less susceptible to work strains that may raise the risk of heart disease and alcoholism. Sociologists also tell us that women are encouraged to be less adventurous than men (and this may be why they are more careful drivers, involved in fewer accidents).

37. What can we learn from the first two paragraphs?

A. Men's lifespan remains almost unchanged.

B. Researchers have found the causes of the age gap.

C. The more advanced a society, the greater the age gap.

D. The age gap was noticed only recently.

原文

②A number of reasons have been proposed to account for the differences. The gap is greatest in industrialized societies, so it has been suggested that women are less susceptible to work strains that may raise the risk of heart disease and alcoholism. Sociologists also tell us that women are encouraged to be less adventurous than men (and this may be why they are more careful drivers, involved in fewer accidents

38. As is suggested in Paragraph 2, the two factors relevant to women's longer lifespan are _____ .

A. diseases and road accidents

B. industrialization and work strains

C. their immunity to heart disease and refusal of alcohol

D. their endurance of work strains and reluctance for adventure

原文

③Even smoking has been implicated in the age discrepancy. It was once suggested that working women are more likely to smoke and as more women entered the work force, the age gap would begin to close, because smoking is related to earlier deaths. Now, however, we see more women smoking and they still tend to live longer although their lung cancer rate is climbing sharply.

39. According to Paragraph 3, which of the following statements is true?

新东方在线 www.koolearn.com 网络课堂电子教材系列

A. The great number of male smokers contributes to the age gap.

B. The growing number of smoking women will narrow the age gap.

C. Female workers are more likely to smoke than male workers.

D. Smoking does not seem to affect women's longevity.

原文

④ One puzzling aspect of the problem is that women do not appear to be as healthy as men. That is, they report far more illnesses. But when a man reports an illness, it is more likely to be serious.

40. Which of the following phenomena makes researchers puzzled?

A. Men's health is more closely related to their emotions.

B. Though more liable to illnesses, women still live longer.

C. Men show worse symptoms than women when they fall ill.

D. Quite a number of men die soon after their retirement.

原文

⑤ Some researchers have suggested that men may die earlier because their health is more strongly related to their emotions. For example, men tend to die sooner after losing a spouse than women do. Men even seem to be more weakened by loss of a job. (Both of these are linked with a marked decrease in the effectiveness of the immune system.)Among men, death follows retirement with an alarming promptness.

⑥ Perhaps we are searching for the answers too close to the surface of the problem. Perhaps the answers lie deeper in our biological heritage. After all, the phenomenon is not isolated to humans. Females have the edge among virtually all mammalian (哺乳动物的)species, in that they generally live longer. Furthermore, in many of these species the differences begin at the moment of conception., there are more male miscarriages (流产).In humans, after birth, more baby boys than baby girls die.

41. The word "edge" in Paragraph 6 means " _____ ".

A. margin B. side

C. advantage D. quality

原文

⑥ Perhaps we are searching for the answers too close to the surface of the problem. Perhaps the answers lie deeper in our biological heritage. After all, the phenomenon is not isolated to humans. Females have the edge among virtually all mammalian (哺乳动物的)species, in that they generally live longer. Furthermore, in many of these species the differences begin at the moment of conception., there are more male miscarriages (流产).In humans, after birth, more baby boys than baby girls die.

42. What is the main idea of the passage?

A. The greater longevity of women remains a mystery.

B. That women are healthier than men well explains their longevity.

C. People are living longer as a result of industrialization.

D. Women are less emotionally affected by difficulties in life.

医疗科普范文二 2012 PASSAGE 4

49. It is stated in Paragraph 1 that organic food _____

50. Farmers use artificial fertilizers and pesticides to _____ .

51. According to Paragraph 3, organic food _____ .

52. What does the author say about meat and poultry?

53. In the last paragraph, people are advised to _____

54. This passage is mainly about _____ .

原文

① On how the world has changed over the last 50 years, not all of it has been good. As you are looking for organic food information, you have obviously become aware that a better alternative exists and you are taking a critical look at the source and production practices of the companies producing the world's food supplies.

49. It is stated in Paragraph 1 that organic food _____ .

A. is considered as a better choice

B. is mostly supplied by world-famous companies

C. has become popular over the last 50 years

D. reflects the change of production practices

原文

② The purpose of organic food information is to give you an understanding of what is going into your food. You will see that there are many benefits to organic food that you didn't know before. The basis behind knowing about organic food information is the fact that farmers are resorting to using artificial fertilizers and pesticides (杀虫剂) to control disease and insect attack in order to produce more crops to satisfy growing demand. These artificial fertilizers leave something poisonous in and on the fruit and vegetables we consume which in turn is absorbed and stored by our bodies.

50. Farmers use artificial fertilizers and pesticides to _____ .

A. satisfy people's critical demand

B. develop better farming technology

C. get a higher crop yield

D. keep people in better health

原文

③ Even the quality of food has gone down in recent years. Today's fruits have nowhere near the Vitamin C levels they did at one time. However, with organic food information you learn that organic food has fifty percent more nutrients, minerals and vitamins than any other form of produce that has been grown under intensive farming. If you are eating non-organic produce you will have to eat more fruit in order to make up for this deficiency. But then the dangerous cycle continues since you will be eating more chemicals that are worse for your health than they are good for you.

51. According to Paragraph 3, organic food _____ .

A. has gone down in quality

B. has more nutrients

C. can replace mass-produced food

D. lacks Vitamin C

原文

④ Another aspect of organic food information is the production of meat and poultry (家禽). Most only consider produce when it comes to organic food information disregarding the antibiotics and hormones that are given to both cattle and poultry that are being force fed. Ask yourself what happens to all these antibiotics and hormones when the animal is killed, the remaining of these antibiotics and growth hormones reside in the meat which are then consumed, digested and stored in human bodies. There is no way that an animal that isn't kept in healthy conditions can produce healthy food for humans to eat.

52. What does the author say about meat and poultry?

A. Organic meat and poultry is hardly available.

B. A great amount of meat is consumed every year.

C. Merciless killing of the animals lowers their quality.

D. They may contain antibiotics and growth hormones.

原文

⑤ You have nothing to lose by trying organic product, not only will it be healthy for you but you will also be able to eat produce and meat the way they are supposed to be. You will likely be so impressed with the taste of organic fruit that you will never return to the mass-produced fruit again. While cost and availability can be a big issue for some, you can do a bit of research online and find a local store that stocks organic produce for a reasonable price.

53. In the last paragraph, people are advised to _____

A. eat traditional produce and meat

B. return to mass-produced fruits

C. do the cost and availability research

D. try organic product for better health and taste

原文

⑤ You have nothing to lose by trying organic product, not only will it be healthy for you but you will also be able to eat produce and meat the way they are supposed to be. You will likely be so impressed with the taste of organic fruit that you will never return to the mass-produced fruit again. While cost and availability can be a big issue

for some, you can do a bit of research online and find a local store that stocks organic produce for a reasonable price.

54. This passage is mainly about _____ .

A. the benefits of organic food information

B. the challenges facing the world food industry

C. changes in food production practices

D. a growing demand for high quality food

医疗科普课后建议练习文章：2008 passage 3

2010 passage 2

2010 passage 4

（二）教育文化

教育文化范文一 2013 PASSAGE 1

21. This passage describes _____ .

22. "Attention blindness" refers to _____ .

23. "Catch us in the act" (Para. 1) is closest in meaning to "find us _____".

24. How many people in the room saw the gorilla in the video?

25. Whom does "he" (last paragraph) refer to?

原文

① Five or six years ago, I attended a lecture on the science of attention. A philosopher who conducts research in the medical school was talking about attention blindness, the basic feature of the human brain that, when we concentrate intensely on one task, causes us to miss just about everything else. Because we can't see what we can't see, our lecturer was determined to catch us in the act. He has us watch a video of six people tossing basketballs back and forth, three in white shirts and three in black,

and our task was to keep track only of the tosses among the people in white. The tape rolled, and everyone began counting.

22. "Attention blindness" refers to _____ .

A. the fact that one can't see what one can't see

B. seeing one thing while missing all else

C. keeping track of just about everything

D. the condition of being blind to details

原文

①Five or six years ago, I attended a lecture on the science of attention. A philosopher who conducts research in the medical school was talking about attention blindness, the basic feature of the human brain that, when we concentrate intensely on one task, causes us to miss just about everything else. Because we can't see what we can't see, our lecturer was determined to catch us in the act. He has us watch a video of six people tossing basketballs back and forth, three in white shirts and three in black, and our task was to keep track only of the tosses among the people in white. The tape rolled, and everyone began counting.

23. "Catch us in the act" (Para. 1) is closest in meaning to "find us _____ ".

A. doing something improper

B. sleeping during the lecture

C. counting the basketball tosses

D. failing to notice something within sight

原文

②Everyone except me. I'm dyslexic(有阅读障碍的)，and the moment I saw that grainy tape with the confusing basketball tossers, I knew I wouldn't be able to keep track of their movements, so I let my mind wander. My curiosity was aroused, though, when about 30seconds into the tape, a gorilla (大猩猩) came in among the players. She (we later learned a female student was in the gorilla suit) stared at the camera, thumped her chest, and then strode away while they continued passing the balls.

③ When the tape stopped, the philosopher asked how many people had counted at least a dozen basketball tosses. Hands went up all over. He then asked who had

counted 13, 14, and congratulated those who'd scored the perfect 15. Then he asked, "And who saw the gorilla?"

④I raised my hand and was surprised to discover I was the only person at my table and one of only three or four in the large room to do so. He'd set us up, trapping us in our own attention blindness. Yes, there had been a trick, but he wasn't the one who had played it on us. By concentrating so hard on counting, we had managed to miss the gorilla in the midst.

24. How many people in the room saw the gorilla in the video?

A. 1.

B. 3 or 4.

C. 13 or 14.

D. 15.

原文

④I raised my hand and was surprised to discover I was the only person at my table and one of only three or four in the large room to do so. He'd set us up, trapping us in our own attention blindness. Yes, there had been a trick, but he wasn't the one who had played it on us. By concentrating so hard on counting, we had managed to miss the gorilla in the midst.

25. Whom does "he" (last paragraph) refer to?

A.The author.

B. The gorilla.

C. The lecturer.

D. The student.

原文

④I raised my hand and was surprised to discover I was the only person at my table and one of only three or four in the large room to do so. He'd set us up, trapping us in our own attention blindness. Yes, there had been a trick, but he wasn't the one who had played it on us. By concentrating so hard on counting, we had managed to miss the gorilla in the midst.

21. This passage describes _____ .

A. a basketball match

B. an experiment

C. a philosopher

D. a gorilla

教育文化范文二 2014 PASSAGE 1

21. Educators are finding that students who cheat _____ .

22. According to the passage, which of the following statements is true?

23. Which of the following points of view would Mr. Huber agree with?

24. The expression "the individuals" (the last paragraph) refers to _____ .

25. The passage mainly discusses _____ .

原文

①Cheating is nothing new. But today, educators and administrators are finding that instances of academic dishonesty on the part of students have become more frequent and are less likely to be punished than in the past. Cheating appears to have gained acceptance among good and poor students alike.

21. Educators are finding that students who cheat _____ .

A. are more likely to be punished than before

B. have poor academic records

C. are not only those academically weak

D. tend to be dishonest in later years

原文

②Why is student cheating on the rise? No one really knows. Some blame the trend on a general loosening of moral values among today's youth. Others have attributed

新东方在线 www.koolearn.com 网络课堂电子教材系列

increased cheating to the fact that today's youth are far more pragmatic (实用主义的) than their more idealistic predecessors. Whereas in the late sixties and early seventies, students were filled with visions about changing the world, today's students feel great pressure to conform and succeed. In interviews with students at high schools and colleges around the country, both young men and women said that cheating had become easier. Some suggested they did it out of spite for teachers they did not respect. Others looked at it as a game. Only if they were caught, some said, would they feel guilty. "People are competitive," said a second-year college student named Anna, from Chicago. There's an underlying fear. If you don't do well, your life is going to be ruined. The pressure is not only from parents and friends but also from oneself. To achieve. To succeed. It's almost as though we have to outdo other people to achieve our own goals.

22. According to the passage, which of the following statements is true?

A. Students' cheating has deep social roots.

B. Students do not cheat on essay tests.

C. Reform in the testing system will eliminate cheating.

D. Punishment is an effective method to stop cheating.

原文

③Edward Wynne, a magazine editor, blames the rise in academic dishonesty on the schools. He claims that administrators and teachers have been too hesitant to take action. Dwight Huber, chairman of the English department at Amarillo, sees the matter differently, blaming the rise in cheating on the way students are evaluated. "I would cheat if I felt I was being cheated," Mr. Huber said. He feels that as long as teachers give short-answer tests rather than essay questions and rate students by the number of facts they can memorize rather than by how well they can put information together, students will try to beat the system. "The concept of cheating is based on the false assumption that the system is legitimate and there is something wrong with the individuals who are doing it," he said." That's too easy an answer. We've got to start looking at the system. "

23. Which of the following points of view would Mr. Huber agree with?

A. Punishment for cheaters should be severe in this country.

B. Parents must take responsibility for the rise in cheating.

C. Cheating would be reduced through all educational reform.

D. Students who cheat should be expelled from school.

原文

③Edward Wynne, a magazine editor, blames the rise in academic dishonesty on the schools. He claims that administrators and teachers have been too hesitant to take action. Dwight Huber, chairman of the English department at Amarillo, sees the matter differently, blaming the rise in cheating on the way students are evaluated. 2009 passage 1

2009 passage 2

（三）环境保护

环境保护范文一 2015 PASSAGE 3

31. What does the author try to emphasize in Paragraph 1? _____

32. According to Paragraph 2, what remains unknown is _____ .

33. The tomato plants in the experiment were _____ .

34. The experiment shows that the infested plant helps its neighbors by _____ .

35. What may be the best title for the passage?

原文

①We tend to think of plants as the furniture of the natural world. They don't move, they don't make sounds, they don't seem to respond to anything—at least not very quickly. But as is often the case, our human view of the world misses quite a lot. Plants talk to each other all the time. And the language is chemical.

31. What does the author try to emphasize in Paragraph 1?

A. How plants communicate is still a mystery.

B. Enough attention has been paid to plant talk.

C. Plants are the furniture of the natural world.

D. Plants can communicate with each other.

原文

②Over the years scientists have reported that different types of plants, from trees to tomatoes, release compounds into the air to help neighboring plants. These chemical warnings all have the same purpose—to spread information about one plant's disease so other plants can defend themselves. But exactly how plants receive and act on many of these signals is still mysterious.

32. According to Paragraph 2, what remains unknown is _____ .

A. how plants receive and handle the signals from their neighbors

B. why plants spread chemical information to their neighbor

C. how many types of plants release compounds into the air

D. whether plants send chemical warnings to their neighbors

原文

③In this week's Proceedings of the National Academy of Sciences, researchers in Japan offer some explanations. They have identified one chemical message and traced it all the way from release to action

④The scientists looked at tomato plants infested (侵害) by common pest, the cutworm caterpillar (毛虫) . To start out, they grew plants in two plastic compartments connected by a tube. One plant was infested and placed upwind and the others were uninfested and placed downwind. The downwind plants were later exposed to the cutworm caterpillar. The results showed that plants that had previously been near sick neighbors were able to defend themselves better against the caterpillar

33. The tomato plants in the experiment were _____ .

A. placed separately but connected through air

B. expose to different kinds of pests

C. exposed to the pest at the same time

D. placed together in a closed compartment

原文

⑤The researchers also studied leaves from exposed and unexposed plants. They found one compound showed up more often in the exposed plants. The substance is

called Hex Vic. When the scientists fed Hex Vic to cutworms, it knocked down their survival rate by 17%. The scientists identified the source of Hex Vic, and sprayed it lightly over healthy plants. Those plants were then able to start producing the caterpillar-killing Hex Vic. Researchers confirmed that uninfested plants have to build their own weapon to fight off bugs and diseases. How do they know when to play defense? They are warned first by their friendly plant neighbors.

34. The experiment shows that the infested plant helps its neighbors by _____ .

A. making more Hex Vic to attract the pest

B. releasing Hex Vic into the air to warn them

C. letting them know how to produce Hex Vie

D. producing enough Hex Vic to kill the pest

原文

⑥It is a complex tale, and it may be happening in more plant species than tomatoes. It may also be happening with more chemical signals that are still unknown to us. For now though, we know that plants not only communicate, they look out for one another.

35. What may be the best title for the passage?

A.Survival of Plants

B. Plant World

C. Talking Plants

D. Plant Bug Killer

环境保护范文二 2015 PASSAGE 4

36. The biggest problem threatening Vancouver as a liveable city is _____ .

37. The upgrade proposal by Vancouver's mayor may be turned down by residents because _____ .

38. The only direction for Vancouver to further expand is towards _____ .

39. TransLink is mentioned (Para. 4) as an example of _____ .

40. According to Todd Litman, the upgrade proposal _____ .

原文

①Vancouver is the best place to live in the Americas, according to a quality-of-life ranking published earlier this month. The city regularly tops such indexes as its clean air, spacious homes and weekend possibilities of sailing and skiing. But its status as a liveable city is threatened by worsening congestion (拥挤). Over the next three decades, another 1 million residents are expected to live in the Greater Vancouver region, adding more cars, bicycles and lorries to roads that are already struggling to serve the existing 2.3 million residents.

36. The biggest problem threatening Vancouver as a liveable city is _____ .

A. increasing congestion

B. climate change

C. shortage of land

D. lack of money

原文

②A proposal by Vancouver's mayor seeks to prevent the worsening conditions. Upgrades would be made to 2,300 kilometres of road lanes, as well as bus routes and cycle paths. Four hundred new buses would join the fleet of 1,830. There would be more trains and more "seabus" ferry crossings between Vancouver and its wealthy northern suburbs. To get all that, residents must vote to accept an increase in sales tax, from 7％ to 7.5％.Polls suggest they will vote no.

37. The upgrade proposal by Vancouver's mayor may be turned down by residents because _____ .

A. they do not want more people to move in

B. they are reluctant to move to new places

C. upgrades would take away their living space

D. upgrades would add to their financial burdens

原文

③Everyone agrees that a more efficient transport system is needed. Confined by mountains to the north, the United States to the south and the Pacific Ocean to the west, Vancouver has spread in the only direction where there is still land, into the Fraser Valley, which just a few decades ago was mostly farmland. The road is often overcrowded

38. The only direction for Vancouver to further expand is towards _____ .

A.the east

B. the west

C. the south

D. the north

原文

④Yet commuters' suspicion of local bureaucrats may exceed their dislike of congestion. TransLink, which runs public transport in the region, is unloved by taxpayers. Passengers blame it when Skytrain, the light-rail system, comes to a standstill because of mechanical or electrical faults, as happened twice in one week last summer, leaving commuters stuck in carriages with nothing to do but expressing their anger on Twitter. That sort of thing has made voters less willing to pay the $ 7. 5 billion in capital spending that the ten-year traffic upgrade would involve.

39. TransLink is mentioned (Para. 4) as an example of _____ .

A. world famous transport companies

B. local residents' complaints about the bureaucrats

C. local effort to improve public transport

D. worsening traffic congestion

原文

⑤ Despite the complaints, Vancouver's transport system is a decent, well-integrated one on which to build, reckons Todd Litman, a transport consultant who has worked for TransLink. "These upgrades are all-important if Vancouver wants to maintain its reputation for being a destination others want to go to. " He says.

40. According to Todd Litman, the upgrade proposal _____ .

A. will solve the traffic problem

B. will benefit local economy

C. satisfies the transport company

D. deserves public support

（四）传记故事

传记故事范文一 2012 PASSAGE 1

31. Why did the boy want to learn judo?

32. When a referee calls a "time-out", _____ .

33. Why did the master insist on continuing the match?

34. What probably caused the defeat of the boy's opponent in the final?

35. Why did the master teach the boy only that one move?

36. What does the passage mainly tell us?

原文

①A 10-year-old boy decided to study judo (柔道) despite the fact that he had lost his left arm in a terrible car accident. The boy began lessons with an old Japanese judo master, and he was doing well. But he couldn't understand why, after three months of training, the master had taught him only one move.

31. Why did the boy want to learn judo?

A. He wanted to get over the accident.

B. He wanted to make up for his disability.

C. He wanted to exercise his right arm.

D. The reason was not mentioned in the passage.

原文

②"Sir," the boy finally said, "shouldn't I be learning more moves?"

③"This is the only move you know, but this is the only move you'll ever need to know," the master replied.

④Not quite understanding, but believing in his teacher, the boy kept training.

⑤Several months later, the master took the boy to his first tournament (锦标赛).

⑥Surprising himself, the boy easily won his first two matches. The third match proved to be more difficult, but after some time, his opponent became impatient and charged; the boy skillfully used his one move to win the match. Still amazed by his success, the boy was now in the finals.

⑦This time, his opponent was bigger, stronger, and more experienced. For a while, the boy appeared to be overmatched. Concerned that the boy might get hurt, the referee called a time-out. He was about to stop the match when the judo master intervened.

32. When a referee calls a "time-out", _____ .

A.the time has run out

B. the game stops for a short time

C. either side can claim victory

D. the game ends in a tie

原文

⑧"No," the judo master insisted, "Let him continue. "

⑨Soon after the match resumed, his opponent made a critical mistake: he dropped his guard. Instantly, the boy used his move to pin him. The boy had won the match and the tournament. He was the champion.

⑩On the way home, the boy and his judo master reviewed every move in each and every match. Then the boy summoned the courage to ask what was really on his mind.

"Sir, how did I win the tournament with only one move?"

"You won for two reasons," the master answered.

"First, you've almost mastered one of the most difficult throws in all of judo. Second, the only known defense for that move is for your opponent to grab your left arm. "

33. Why did the master insist on continuing the match?

A. He didn't want to give the opponent an advantage.

B. The boy was confident of winning.

C. He had confidence in the boy's skill.

D. All he cared about was winning the final.

原文

⑧"No," the judo master insisted, "Let him continue. "

⑨Soon after the match resumed, his opponent made a critical mistake: he dropped his guard. Instantly, the boy used his move to pin him. The boy had won the match and the tournament. He was the champion.

⑩On the way home, the boy and his judo master reviewed every move in each and every match. Then the boy summoned the courage to ask what was really on his mind.

34. What probably caused the defeat of the boy's opponent in the final?

A. Over-confidence.

B. Impatience.

C. Inexperience.

D. Exhaustion.

原文

"Sir, how did I win the tournament with only one move?"

"You won for two reasons," the master answered.

"First, you've almost mastered one of the most difficult throws in all of judo. Second, the only known defense for that move is for your opponent to grab your left arm. "

35. Why did the master teach the boy only that one move?

A. The boy could not do other moves with only one arm.

B. It was the only move the master knew well.

C. It was the move his opponent would not be good at.

D. His opponent would be helpless once he made that move.

原文

"Sir, how did I win the tournament with only one move?"

"You won for two reasons," the master answered.

"First, you've almost mastered one of the most difficult throws in all of judo. Second, the only known defense for that move is for your opponent to grab your left arm. "

36. What does the passage mainly tell us?

A. One can turn a weakness into an advantage.

B. It is very difficult to have a good teacher.

C. Even a disabled person can win a match.

D. Practice makes perfect.

传记故事范文二 2016 PASSAGE 3

31. WWOOFing enables volunteers to _____ .

32. The author found his farm life in La Réunion quite _____ .

33. The author did all of the following on the organic farm EXCEPT _____ .

34. The philosophy of WWOOFing is to _____ .

35. This passage is mainly about _____ .

原文

①Last year, I went WWOOFing (Willing Workers on Organic Farms) at a beautiful organic farm in La Réunion. With WWOOFing, volunteers exchange their time and work for food and accommodation. I slept in a cabin in the woods with hedgehogs (刺猬) digging about in the bushes, all different coloured birds singing in the morning and endless rows of palm trees offering shade from the sun.

31. WWOOFing enables volunteers to _____ .

A. get food and shelter for their work

B. travel around La Réunion for free

C. tell the differences between various birds

D. have close contact with wild animals

原文

② For me, one of the best ways to get to know a new place is to work with the land, live with the locals and share meals together. This is why I absolutely love WWOOFing. It has got to be one of the best ways to travel. It is a mutually beneficial exchange where everyone involved prioritises people and environment above profit. You get the time and space to deepen a connection with local communities and nature.

③There is a lot to learn and each farm has its own unique way of doing things, depending on the environment, climate and soil. At the farm in La Réunion we planted palm trees to harvest the core of the trunk which can be eaten in salads. Before staying with the farm I had only eaten heart of palm from cans which were nothing in comparison to the real thing, fresh from the ground. When potting up the very beginnings of the palm trees, I felt grateful to be a part of the start of the trees' cycle. I was filled with awe that something so small could grow into something so big and strong.

32. The author found his farm life in La Réunion quite _____ .

A. awful B. rewarding

C. comfortable D. difficult

原文

③There is a lot to learn and each farm has its own unique way of doing things, depending on the environment, climate and soil. At the farm in La Réunion we planted palm trees to harvest the core of the trunk which can be eaten in salads. Before staying with the farm I had only eaten heart of palm from cans which were nothing in comparison to the real thing, fresh from the ground. When potting up the very beginnings of the palm trees, I felt grateful to be a part of the start of the trees' cycle. I was filled with awe that something so small could grow into something so big and strong.

33. The author did all of the following on the organic farm EXCEPT _____ .

A. removing weeds

B. planting palm trees

C. harvesting fruits

D. collecting vegetables

原文

④We also did lots of weeding, which helped me to get to know all kinds of different plants, to be able to identify which ones we could use as herbs medicine in salads and which were seen as uneatable. I also got to harvest pineapples and guava fruit (番石榴) to make jams which will be sold at the local market

⑤Of course, not everyone is able to travel far away into the field. The great thing about the skill-share philosophy behind WWOOFing is that it's something we can all do from our own backyard. The focus shifts from money to how we can best support each other in our communities. A fair exchange can make a big difference in the world.

34. The philosophy of WWOOFing is to _____ .

A. improve local environment

B. make locals live better

C. unite different communities

D. advocate a fair exchange

原文

⑤Of course, not everyone is able to travel far away into the field. The great thing about the skill-share philosophy behind WWOOFing is that it's something we can all do from our own backyard. The focus shifts from money to how we can best support each other in our communities. A fair exchange can make a big difference in the world.

35. This passage is mainly about _____ .

A. the development of WWOOFing

B. a local WWOOFing community

C. a charming WWOOFing experience

D. the system of WWOOFing

（五）社会现象

社会现象范文一 2016 PASSAGE 2

26. According to the author, AlphaGo's victory _____ .

27. The word "presage" (Para. 2) is closest in meaning to " _____ " .

28. What is the author's attitude towards the human future in the face of technology?

29. Which of the following is the most fundamental to human interaction?.

30. According to the author, the skills of deep human interaction _____ .

原文

① AlphaGo's victory over Go (围棋) champion Lee Se-dol reportedly shocked artificial intelligence experts, who thought such an event was 10 to 15 years away. But if the timing was a surprise, the outcome was not. On the contrary, it was inevitable and entirely foreseeable.

26. According to the author, AlphaGo's victory _____ .

A. could have happened earlier

B. came as a pleasant surprise

C. was an expected result

D. was more a matter of luck

原文

②Playing complex games is precisely what computers do supremely well. Just as they beat the world champions at checkers (跳棋) and then chess, they were destined to beat the champion at Go. Yet I don't believe, as some do, that human defeats like this one presage an era of mass unemployment in which awesomely able computers leave most of us with nothing to do. Advancing technology will profoundly change the nature of high-value human skills and that is threatening, but we aren't doomed.

27. The word "presage" (Para. 2) is closest in meaning to " _____ " .

A. survive B. suffer

C. invent D. predict

原文

②Playing complex games is precisely what computers do supremely well. Just as they beat the world champions at checkers (跳棋) and then chess, they were destined to beat the champion at Go. Yet I don't believe, as some do, that human defeats like this one presage an era of mass unemployment in which awesomely able computers leave most of us with nothing to do. Advancing technology will profoundly change the nature of high-value human skills and that is threatening, but we aren't doomed.

28. What is the author's attitude towards the human future in the face of technology?

A. Unclear. B. Confused.

C. Worried. D. Optimistic

原文

③The skills of deep human interaction, the abilities to manage the exchanges that occur only between people, will only become more valuable. Three of these skills stand out. The first, the foundation of the rest, is empathy, which is more than just feeling someone else's pain. It's the ability to perceive what another person is thinking or feeling, and to respond in an appropriate way.

29. Which of the following is the most fundamental to human interaction?

A. Social sensitivity of group members to understand each other.

B. Strong ability to share people's feelings and respond.

C. Team spirit to make sure that everyone is involved.

D. Inspirational storytelling to motivate people to act

原文

④The second is creative problem-solving in groups. Research on group effectiveness shows that the key isn't team cohesion or motivation or even the smartest member's IQ; rather, it's the social sensitivity of the members, their ability to read one another and keep anyone from dominating.

⑤The third critical ability, somewhat surprisingly, is storytelling, which has not traditionally been valued by organizations. Charts, graphs and data analysis will continue to be important, but that's exactly what technology does so well. To change people's minds or inspire them to act, tell them a story

⑥ These skills, though basic to our humanity, are fundamentally different from the skills that have been the basis of economic progress for most of human history, such as logic, knowledge and analysis, which we learned from textbooks and in classrooms. By contrast, the skills of deep human interaction address the often irrational reality of how human beings behave, and we find them not in textbooks but inside ourselves. As computers master ever more complexity, that's where we'll find the source of our continued value.

30. According to the author, the skills of deep human interaction _____ .

A. are the source of true human values in the future

B. can work with knowledge to make the world better

C. are similar to the skills of human logic and analysis

D. can be learned from textbooks and in classrooms

社会现象范文二 2015 PASSAGE 2

26. Before the 1970s, many colleges ran in loco parentis system because _____ .

27. Who won the case of Gott versus Berea College in 1913? _____

28. The word "dissent" (Para. 5) probably means "_____ " .

29. In 1960, the court ruled that Alabama State College _____ .

30. According to Gary Dickstein, today's "helicopter parents" _____ .

原文

① Before the 1970s, college students were treated as children. So many colleges ran in loco parentis system. "In loco parentis" is a Latin term meaning "in the place of a parent".It describes when someone else accepts responsibility to act in the interests of a child.

26. Before the 1970s, many colleges ran in loco parentis system because _____ .

A. they could take the place of the students' parents

B. parents asked them to do it for the interests of their children

C. this was a tradition established by British colleges

D. college students were regarded as too young to be treated as adults

原文

② This idea developed long ago in British common law to define the responsibility of teachers toward their students. For years, American courts upheld in loco parentis in cases such as Gott versus Berea College in 1913.

27. Who won the case of Gott versus Berea College in 1913? _____

A. Berea College.

B. Gott.

C. It was a win-win case.

D.The students.

原文

③Gott owned a restaurant off campus. Berea threatened to expel students who ate at places not owned by the school. The Kentucky high court decided that in loco parentis justified that rule.

④In loco parentis meant that male and female college students usually had to live in separate buildings. Women had to be back at their dorms by ten or eleven on school nights.

⑤But in the 1960s, students began to protest rules and restrictions like these. At the same time, courts began to support students who were being punished for political and social dissent.

28. The word "dissent" (Para. 5) probably means "_____ " .

A. extreme behaviors

B. violation of laws

C. strong disagreement

D. Wrong doings

原文

⑥In 1960, Alabama State College expelled six students who took part in a civil rights demonstration. They sued the school and won. After that it became harder and harder to defend in loco parentis.

29. In 1960, the court ruled that Alabama State College _____ .

A. had no right to expel the students

B. was justified to have expelled the students

C. shouldn't interfere with students' daily life

D. should support civil rights demonstrations

原文

⑦At that time, students were not considered adults until 21. Then, in 1971, the 24th amendment to the Constitution set the voting age at eighteen. So in loco parentis no longer really applied.

⑧ Slowly, colleges began to treat students not as children, but as adults. Students came to be seen as consumers of educational services.

⑨ Gary Dickstein, an assistant vice president at Wright State University in Dayton, Ohio, says in loco parentis is not really gone. It just looks different. Today's parents, he says, are often heavily involved in students' lives. They are known as "helicopter parents". They always seem to hover over their children. Gary Dickstein says these parents are likely to question decisions, especially about safety issues and grades. They want to make sure their financial investment is not being wasted.

30. According to Gary Dickstein, today's "helicopter parents" _____ .

A. don't set their hearts at rest with college administrators

B. keep a watchful eye on their children's life and study

C. care less about their children's education than before

D. have different opinions on their children's education
