# 第四部分 SECTION B

B 节为短文阅读 4-5 分

是博客与跟帖或相关短文阅读、短文主题快读、广告浏览

## （一）2013

Directions: In this section, you are required to read one quoted blog and the comments on it. The blog and comments are followed by questions or unfinished statements, each with four suggested answers A, B, C and D. Choose the best answer and mark your answer on the ANSWER SHEET.

41. The passage is mainly concerned with cultural differences in _____ .

42. The word "alert" (Para. 3) is closest in meaning to " _____ ".

43. According to Comment 1, in the Netherlands, calling one's own child "intelligent" is _____ .

44. What nationality is the writer of Comment 2?

45. All of the following are true of Comment 3 EXCEPT that _____ .

原文

① A fascinating new study reveals that Americans are more likely to call their children "intelligent," while European parents focus on happiness and balance.

②Here's what one parent had to say about the intelligence of her 3-year-old, which was apparent to her from the very first moments of her life:

③ I have this vivid memory, when she was born, of them taking her to clean her off...And she was looking all around...She was alert from the very first second... I took her out when she was six weeks old to a shopping mall to have her picture taken—people would stop me and say, "What an alert baby. " One guy stopped me and said, "Lady, she was an intelligent baby. "

42. The word "alert" (Para. 3) is closest in meaning to " _____ ".

A.intelligent

B. easy-going

C. quick at noticing things

D. happy

原文

Comment 1:

Probably indicates more about differences in cultural attitudes towards humility and boasting than about parenting styles. Here in the Netherlands if someone called their child "intelligent", I'd be rolling my eyes, both because it's probably biased and overstated and because it's just a rotten thing to draw attention to; as if it's all about whose child is "better". Life isn't that much of a damn contest to us.

43. According to Comment 1, in the Netherlands, calling one's own child "intelligent" is _____ .

A. boasting

B. Acceptable

C. encouraging

D. reasonable

原文

Comment 2:

Agreed! That would apply in Sweden too. Parenting is more focused on the child's well-being than social competition (there may be pressures here too, but it is not socially acceptable to express those things).

44. What nationality is the writer of Comment 2?

A. Dutch.

B. American.

C. Swedish.

D. French.

原文

Comment 3:

I agree and 1 live in the U. S. Parents' opinions of their children's intellect are definitely biased and overstated. It is the most annoying thing to listen to. Being "advanced" at a young age has little if anything to do with their ability to learn as they get older and every child is a genius, if you give them a chance and an ear to listen to them. The happier the kid is, the smarter they will be. Happy and healthy is key.

45. All of the following are true of Comment 3 EXCEPT that _____ .

A. it agrees with all the other comments

B. being happy and healthy is important

C. being intelligent at a young age makes no sense

D. children's intellect varies from person to person

原文

Comment 3:

I agree and 1 live in the U. S. Parents' opinions of their children's intellect are definitely biased and overstated. It is the most annoying thing to listen to. Being "advanced" at a young age has little if anything to do with their ability to learn as they get older and every child is a genius, if you give them a chance and an ear to listen to them. The happier the kid is, the smarter they will be. Happy and healthy is key.

41. The passage is mainly concerned with cultural differences in _____ .

A. bringing up one's children

B. describing one's children

C. social contests

D. choosing a place to live in

## （二）2014

41. The word "they" (Para. 1) refers to _____ .

42. What is the main conclusion of the Robinson and Harris's study?

43. Comment 1 suggests that _____ .

44. The writer of Comment 2 would probably agree that _____ .

45. Which of the following parental helps will the writer of Comment 3 consider proper?

原文

① One of the central principles of raising kids in America is that parents should be actively involved in their children's education: meeting with teachers, volunteering at school, helping with homework, and doing a hundred other things that few working parents have time for. These obligations are so baked into American values that few parents stop to ask whether they're worth the effort.

41. The word "they" (Para. 1) refers to _____ .

A. values

B. obligations

C. studies

D. principles

原文

② Until this January, few researchers did, either. In the largest-ever study of how parental involvement affects academic achievement, Keith Robinson and Angel L. Harris, two sociology professors at Duke, found that mostly it doesn't. The researchers combed through nearly three decades' worth of surveys of American parents and tracked 63 different measures of parental participation in kids' academic lives, from helping them with homework, to talking with them about college plans. In an attempt to show whether the kids of more-involved parents improved over time, the researchers indexed these measures to children's academic performance, including test scores in reading and math.

42. What is the main conclusion of the Robinson and Harris's study?

A. Parental involvement works better with low-achievers.

B. Schools should communicate with parents regularly.

C. The kids of more-involved parents improve over time.

D. Parental involvement may not necessarily benefit children.

原文

③What they found surprised them. Most measurable forms of parental involvement seem to yield few academic dividends for kids, or even to backfire (适得其反) — regardless of a parent's race, class, or level of education.

④Do you review your daughter's homework every night? Robinson and Harris's data show that this won't help her score higher on standardized tests. Once kids enter middle school, parental help with homework can actually bring test scores down, an effect Robinson says could be caused by the fact that many parents may have forgotten, or never truly understood, the material their children learn in school.

⑤While Robinson and Harris largely disproved that assumption, they did find a handful of habits that make a difference, such as reading aloud to young kids (fewer than half of whom are read to daily) and talking with teenagers about college plans. But these interventions don't take place at school or in the presence of teachers, where policy makers have the most

Comment 1:

Basically the choice is whether one wants to let kids to be kids. Persistent parental involvement and constantly communicating to the kids on what the parents want consciously or unconsciously would help the kids grow up or think like the parents sooner than otherwise.

43. Comment 1 suggests that _____ .

A. parents may influence children's thinking

B. persistent parental involvement is a must

C. parents should leave their children alone

D. kids should be kids after all

原文

Comment 2:

It also depends on the kid. Emotional and social maturity have a lot to do with success in college and in life. Some kids may have the brains and are bored by high school, but that doesn't mean they are ready for college or the work place.

44. The writer of Comment 2 would probably agree that _____ .

A. social maturity is sufficient to achieve success in life

B. high school is often boring in the U. S.

C. high intelligence does not guarantee success

D. getting ready for college is an emotional process

原文

Comment 3:

The article doesn't clearly define "helping", but I understood it as actually assisting children in the exercises (e. g. helping them to solve a math problem) and/or reviewing their work for accuracy rather than simply making sure they've completed their work. I think the latter is more helpful than the former. I would also certainly hope that no study would discourage parents from monitoring their children's performance!

45. Which of the following parental helps will the writer of Comment 3 consider proper?

A. Assisting kids in their exercises.

B. Making sure kids have finished their work.

C. Reviewing kids' homework for accuracy.

D. Monitoring kids' class performance.

## （三）2015

41. What do we know about diet soda sale?

42. What does the author think of the prospects of diet soda sale?

43. Which comment gives a personal reason for quitting diet colas?

44. Which comment supports the author's point of view?

45. Which comments disagree with the author on the cause of soda sale slowdown?

原文

① Towards the end of the 1990s, more than a decade and a half after Diet Coke was first introduced, sale of Coca Cola's best-selling low caloric drink appeared to slow down.

41. What do we know about diet soda sale?

A. It began to undergo a gradual drop starting from 2000.

B. It was on the decline since the 1990s but is on the rise now.

C. It reached its peak in the 2000s but began to drop since then.

D. It has been decreasing since the 1990s.

原文

② However, in the decade that followed, diet sodas grew by more than 30 percent. In 2009, sales pushed above $ 8.5 billion for the first time. But America's thirst for Diet Coke is running dry again—and this time it could be for good.

③ The diet soda slowdown isn't merely an American thing—it's also happening worldwide. But the future of diet colas is particularly cloudy in the United States.

④ Low calorie sodas are fighting a hard battle against not one but two trends among American consumers. The first is that overall soda consumption has been on the decline since before 2000. Diet sodas, though they might come sugar-and calorie-free, are still sodas, something Americans are proving less and less interested in drinking.
⑤ The second, and perhaps more significant trend, is a growing mistrust of artificial sweeteners (甜味剂). "Consumers' attitudes towards sweeteners have really changed. "said Howard Telford, an industry analyst. "There's a very negative perception about artificial sweeteners. The industry is still trying to get its head around this. "

42. What does the author think of the prospects of diet soda sale?

A. It will continue to drop.

B. It will get better soon.

C. It is hard to say for sure.

D. It may have ups and downs.

原文

Comment 1

Add me to the number of people addicted to diet colas who quit drinking soda altogether. I honestly think soda is addictive and I'm happy not to be drinking it anymore.

Comment 2

Perhaps the slowdown has something more to do with the skyrocketing cost of soft drinks.

Comment 3

I LOVE diet drinks! Am I unhealthy? Who knows? I guarantee I have a better physique than most 43-year-old men.

43. Which comment gives a personal reason for quitting diet colas?

A. Comment 5.

B. Comment 4.

C. Comment 3.

D. Comment 1.

原文

Comment 4

This is a silly and shallow piece. The reason for the fall off is simply the explosion in consumption of bottled waters and energy drinks.

Comment 5

As people learn more about health and wellness they will consume less sugar, less soda, less artificial sweeteners.

45. Which comments disagree with the author on the cause of soda sale slowdown?

A. Comment 3 and Comment 5.

B. Comment 2 and Comment 4.

C. Comment 1 and Comment 4.

D. Comment 2 and Comment 3.

原文

## （四）2016

41. Which of the following might the writer of the passage agree with?

42. According to the writer of the passage, perception _____ .

43. The writer of Comment 1 seems to _____ .

44. Speaking of Steve Jobs, the writer of Comment 2 _____ .

45. When he went to the dinner party in jeans (Comment 3), the philosopher _____ .

原文

① The saying "Clothes Make the Man" dates back some 400 years and it refers to the fact that when people see a well-dressed person, they assume that person is a professional, capable, and (especially in the old days) rich. Therefore, you had to dress like how you wanted to be perceived, what you wanted to eventually achieve. Fast forward 400 years, lots of folks still think the same way. But does it really make a difference?

41. Which of the following might the writer of the passage agree with?

A. Steve Jobs and Bill Gates dress formally.

B. We should not judge a person by his clothing.

C. It is clothes that make the man.

D. The well-dressed are most likely to succeed

原文

②I happen to be one of those who do not put faith in the old saying. I suppose I might be in the minority but I am a member of an elite club with the likes of Steve Jobs and Bill Gates in my camp.

新东方在线 www.koolearn.com 网络课堂电子教材系列

③Perception is not reality; perception is halfway to discovering reality. Perception is drawn from our own impressions, our own belief systems. Is it powerful and influential? Absolutely! Is it all that it seems? Less often than you think. How many times have you cast an initial judgment only to surprise yourself later and learn how you missed out on a great opportunity, person or idea?

42. According to the writer of the passage, perception _____ .

A. might prove wrong

B. is powerful and reliable

C. is half reality

D. might be worthless to us

原文

Comment 1

In the present era, many associate the well-dressed with being the most successful. It took folks in the business world a long time to overlook the way Steve Jobs wore jeans on the public stages. I did not know Mr. Jobs, though I wish I had. I have heard it said that he invented the concept of "business casual". In my mind that is as much a matter of self-confidence as it is a matter of taste in clothing.

43. The writer of Comment 1 seems to _____ .

A. dislike the way Steve Jobs dressed for business occasions

B. suggest that business people have no taste in clothing

C. believe that the well-dressed are the most successful

D. think that Steve Jobs' casualness reflected his self-confidence

原文

Comment 2

You are wrong about Steve Jobs. He certainly did care about how he was perceived and his appearance was very much calculated to achieve his desired effect. From his early formal business clothing down to the aggressive casualness of his eventual black turtle neck and jeans uniform, his clothes and the impact they made were clearly foremost in his mind.

新东方在线 www.koolearn.com 网络课堂电子教材系列

44. Speaking of Steve Jobs, the writer of Comment 2 _____

A. points out that Steve Jobs was a very aggressive person

B. suggests that he and Steve Jobs used to be in the same club

C. holds the same view as the writer of the passage

D. thinks Steve Jobs' casualness was carefully thought out

原文

Comment 3

It reminds me of the story about the philosopher who went to a formal dinner party in jeans. When asked if he felt out of place because of his clothes, he looked around and said he hadn't noticed.

45. When he went to the dinner party in jeans (Comment 3), the philosopher _____ .

A. thought that people liked his clothes

B. was not aware of how his clothes looked

C. felt quite embarrassed

D. considered himself out of place
