The process of gaining or losing weight can be explained by comparing your body to your car. Both run __56__ fuel, food for your body and gasoline for your car. Both __57__ that fuel, first into heat, then energy, some of __58__ is used to do work, and some emitted as waste. And 59 your car uses more energy when the engine is racing than when it is idling, __60__ does your body use more energy when you are working hard than __61__ you are resting.

For the purpose of this comparison, __62__, there is one significant difference between them. Your car cannot store fuel by turning it into 63 else; all gasoline not __64__ remains as gasoline. But your body stores 65 energy as fat. When the gas tank is __66__ empty, the car won't run; but your body can burn fat to provide more energy.

Therefore, if you want to gain weight, you must do __67__ of two things: eat more calories (units of heat, therefore energy), or use less through __68__. If you want to lose weight, you do the __69__, decrease your intake of calories or increase the amount of energy you spend. There is __70__ way. Gaining or losing weight is always a relation between intake and output of potential energy.

56. A. in B. on C. for D. against

57.	A. convert	B. use	C. spend	D. burn
58.	A. what	B. which	C.it	D. them
59.	A. whereas	B. although	C. just because	D. just as
60.	A. as	B. so	C. why	D. how
61.	A. that	B. since	C. when	D. where
62.	A. however	B. therefore	C. moreover	D. likewise
63.	A. everything	B. nothing	C. something	D. anything
64.	A. filled	B wasted.	C. saved	D. consumed
65.	A. useless	B. enough	C. excess	D. extensive
66.	A. half	B. completely	C. almost	D. hardly
67.	A. any	B. both	C. either	D. neither
68.	A. inactivity	B. inattention	C. cycling	D. jogging
69.	A. reverse	B. relevant	C. different	D. same
70.	A. not any	b. no other	C. another	D. some

A presentation has two important components: what you say and 56 you deliver it. The term delivery covers a wide 57 of features of speaking and eye contact is one of them. The appropriate use of eye contact 58 from one culture to another. In some cultures, women are 59 to lower their eyes in most communication 60 ; in others, younger people must keep their eyes lowered when addressing older people.

61 , in the United States, 62 you are addressing an individual, a small group of people, or a larger audience, you are expected to look at them. You do not have to stare 63 and continuously; 64 , it is appropriate when speaking to one person to 65 occasionally.

In a small group you should look around at the different members of the group. 66 when addressing a larger audience, you should try to make eye contact with different people around the room. It is important to look at the 67 audience, not just the people in the center of the room, 68 you will probably have to turn your head and/or your body in order to make proper eye contact with people 69 at the sides of the room.

If you look at the floor or the ceiling, you will give the impression that you are not interested in your audience. A speaker establishes friendly relationship with the audience mainly 70 eye contact, and

新东方在线 www.2study.com 网络课堂电子教材系列

good relationship is essential to the success of any speech.

56.	A. why	B. whom	C. how	D. where
57.	A. stretch	B. expanse	C. extent	D. range
58.	A. varies	B. alters	C. specifies	D. differentiates
59.	A. assumed	B. proposed	C. expected	D. desired
60.	A. domains	B. settings	C. scopes	D. environments
61.	A. Otherwise	B. Moreover	C. Likewise	D. However
62.	A. whether	B. either	C. though	D. unless
63.	A. constantly	B. intensly	C. properly	D. desperately
64.	A. in addition	B. for instance	C. in fact	D. on the other hand
65.	A. look away	B. look around	C. look back	D. look over
66.	A. Even	B. And	C. Thus	D. Or
67.	A. total	B. overall	C. utter	D. entire
68.	A. So	B. Yet	C. Then	D. But
69.	A. seat	B. seated	C. be seated	D. being seating
70.	A. upon	B. after	C. through	D. until

09 年真题

Nuclear energy is an efficient and convenient substitute for conventional forms of energy which were found in special geographical locations. Large amounts of 61 and effort are required to 62 these locations. Once the sites are found, men and equipment must be brought to tap and use these sources of energy. However, a large proportion of such sites are found only in far and 63 places.

This increases the difficulties of 64 these forms of energy. With nuclear energy, such difficulties are not present. Nuclear reactors can easily be built anywhere, and man does not have to compete with the 65 of nature in order to obtain the energy. For equal amounts of energy, nuclear energy is much more convenient and inexpensive to obtain than conventional sources of energy.

With nuclear energy, the amount of pollution is greatly reduced. 66 the production of nuclear energy is based on the fission (裂变) of atoms, pollution is kept to a very low level. The energy produced in the reactors is converted into heat and electricity, and these have 67 or no pollution at all. Conventional forms of fuel, 68 , produce large amounts of pollution.

Production of nuclear energy uses the 69 of the fission of atoms; thus, 70 amounts of energy can be obtained from it. The world's

reserves of oil, coal and natural gas are running___71___at a tremendous rate and current estimates predict that___72___of the 21st century, most of these conventional fuels will be used up.

Nuclear energy is the exception___73___this gloomy prediction. Through splitting and fusing atoms, large amounts of energy can be produced, and___74___this process can go on and on until all our energy needs are satisfied. The___75___of nuclear energy as a boundless source of energy is indeed great, and we must harness it whenever possible as conventional fuels will not be around much longer.

61.	A. incentive	B. capital	C. interest	D. currency
62.	A. point	B. recognize	C. identify	D. label
63.	A. isolated	B. single	C. sole	D. solitary
64.	A. detecting	B. selecting	C. harnessing	D. concentrating
65.	A. potentials	B. powers	C. strengths	D. forces
66.	A. If	B. While	C. Though	D. Since
67.	A. little	B. much	C. more	D. less
68.	A. as a result	B. in general	C. on the other hand	D. in effect
69.	A. process	B. rule	C. principle	D. function
70.	A. incomplete	B. definite	C. infinite	D. defined
71.	A. out	B. up	C. away	D. down
72.	A. at the end	B. by the end	C. in the end	D. to the end

10 年真题

Are you single but too busy to search for love? Then you need to try the latest dating phenomenon that is sweeping 61 the UK—speed dating.

Speed dating 62 men and women meeting in a room and finding out as mush as they can about possible 63 in three minutes. It's proving very 64 with Britain's young people who find that they haven't got the time to meet that special one.

At a speed dating event you are given three minutes to talk, 65 , with a member of the opposite sex. Then a bell is 66 and you move to another person and start chatting again. By the end of the evening you will have spoken with up to twenty men or women!

If, by the end of a conversation, you 67 the person or would like to see him or her again, you write it 68 on a card. Then, if the other person also fancies you, the organisers will contact you with their details.

But is three minutes long enough to make an impression and 69 if you want to see someone again? Research suggests that 70 can be felt within the first thirty seconds of meeting someone, and that is 71 speed dating is all about, knowing quickly if you are going to like someone.

And what about romance? Is it possible to make a good 72 in

such a short time? 73 , people say you can't hurry love. However Britain will soon have its first marriage from a speed date.

So, if you are on a 74 to find Mr. or Miss Right, what have you got to lose? 75 , you still go home on your own. But at best, the person of your dreams could be just three minutes away.

61.	A. across	B. off	C. over	D. through
62.	A. requires	B. inquires	C. involves	D. revolves
63.	A. spouses	B. partners	C. friends	D. counterparts
64.	A. popular	B. practical	C. favorable	D. normal
65.	A. all in one	B. one after one	C. one and all	D. one on one
66.	A. knocked	B. shaken	C. rung	D. swung
67.	A. attract	B. enjoy	C. fancy	D. chase
68.	A. off	B. down	C. up	D. back
69.	A. work out	B. work on	C. work at	D. work up
70.	A. emotion	B. sentiment	C. attachment	D. chemistry
71.	A. what	B. how	C. all	D. where
72.	A. conclusion	B. reflection	C. judgment	D. guess
73.	A. After all	B. In all	C. Of all	D. And all
74.	A. tour	B. route	C. mission	D. direction
75.	A. At last	B. At first	C. At end	D. At worst

Zoos have become an important site for the preservation and protection of wildlife resources, 61 those species that are endangered. 62 , many zoos displayed live animals for public entertainment. Presently some zoos have become scientific and educational 63 that have contributed to the understanding and conservation of wild animal populations.

64 the challenges facing modern zoos are the cost of upgrading old facilities, the struggle to obtain 65 operating funds, and the need to attract more visitors to new and entertaining exhibits.

Many 66 zoos in American cities have undergone renovation (翻新) during the last decades of the twentieth century. Among the recent trends in zoo 67 is the construction of new enclosures that resemble natural habitats (栖息地). The replacement of traditional steel bars and concrete floors 68 appropriately designed surroundings improves visitor appreciation of the animals. Such renovations may 69 stress on animals and allow them to interact with one another more naturally.

Several major zoos conduct captive propagation programs. A captive propagation program includes the breeding of 70 zoo or wild animals to obtain offspring, usually for release to 71 or for

transfer to other zoos. Captive breeding is one method of ___72___ some species from extinction.

Zoos have expanded and improved public education programs also, with education departments that develop programs ___73___ zoo exhibits. Public activities include in-school programs, zoo tours, special events, and websites. The Zoological Society of New York, for example, conducted a major project with a Western African government to monitor an elephant herd ___74___ it moved throughout its range.

The importance of zoos will increase as natural habitats are diminishing. Through their efforts ___75___ conservation, education, and environmental advocacy, zoos will continue to play a critical role in wildlife preservation throughout the world.

61.	A. superficially	B. especially	C. importantly	D. supposedly
62.	A. By that time	B. By the time	C. At one time	D. At that time
63.	A. institutions	B. associations	C. foundations	D. corporations
64.	A. Along	B. Toward	C. Among	D. Through
65.	A. limited	B. professional	C. sufficient	D. excessive
66.	A. newer	B. older	C. former	D. later
67.	A. management	B. improvement	C. achievement	D. assessment
68.	A. under	B. for	C. into	D. with
69.	A. reduce	B. cause	C. increase	D. avoid

70.	A. selected	B. sustained	C. promising	D. surviving
71.	A. natural	B. the natural	C. wild	D. the wild
72.	A. restraining	B. saving	C. sheltering	D. exempting
73.	A. attributed to	B. opposed to	C. referred to	D. related to
74.	A. as	B. as if	C. so	D. so that
75.	A. in search of	B. in honor of	C. in support of	D. in charge of
